Let's face it... you would like to tune your amplifier to certain specified frequencies and you find out that your personal adjustments are not just sufficient. Raffles Boam made a few adjustments to the original tools to make them more user friendly... without compromising the accuracy of the tools. We have added a lift up tab to the upper level where the tool rests on the speaker and the lower level with the gear handle and the hole for the screwdriver and Allen wrench. Both tools are now much easier to get to when working on or near the amplifier. Measurement of Angle and Distance The Adjustment Racks measure angle and distance with absolute accuracy... the only adjustment required to the tool is to add or subtract 1 degree or 1 inch and recalibrate. The lower level of the Adjustment Racks are limited
